

To whom it may concern:

Casey O'Brien and CCBC have worked closely with my magnet high school program for many years. He has provided valuable insight into what is expected at the college level. His level of commitment to the future of information assurance is exemplary and serves as a standard to which I hold my students.

He has visited as a guest speaker and hosted numerous field trips over many years. Recently, he demonstrated information detection systems. My students really enjoyed the visit and it inspired many to experiment with all sorts of good guy and bad guy software. Another visit in the near future he will explain WEP, WPA and WPA2 wireless encryption.

Many bright students from my magnet program continue their education with him. To a person, those students excel under his watch and are launched into terrific careers. If you have any questions regarding Mr. O'Brien's relationship with my magnet program, please contact me, ben@benconry.com 443 850 7601.

Sincerely,

Ben Conry
